PROJECTS

Patient Management App

Flutter Mobile App

2025 - Present

Developed a comprehensive, cross-platform medical application using Flutter. The app digitizes patient and appointment management, supporting three distinct user roles (Admin, Doctor, Patient) with custom permissions for each.
Key Features: Multi-role authentication system, patient data management, and appointment scheduling.
Technologies Used: Flutter, Dart, Firebase.

SGLASS E-commerce Store

Web Development Project

2022 - 2023

Developed the frontend for an online eyewear store, focusing on creating an engaging and user-friendly shopping experience.
Technologies Used: HTML, CSS, JavaScript, SASS.
